

MAKING MINING
EQUIPMENT MORE
PRODUCTIVE

YOUR AIM SHOULD NOT BE MERELY KEEPING YOUR MINING
EQUIPMENT IN MOTION. NO, YOUR AIM SHOULD BE TO RAISE
THE PRODUCTIVITY BAR EVERY SINGLE SHIFT.

THAT'S HOW YOU MOVE FORWARD IN THE MINING BUSINESS.

AIM HIGHER

WE'LL HELP YOU FIGHT FOR EVERY TONNE

WHAT WE DO AT SCHLAM IS MAKE MINING EQUIPMENT MORE PRODUCTIVE.

How we do it is by solving the maintenance and payload challenges that keep your mine from being better tomorrow than it was today.

Better doesn't come easy in mining. If it did everyone would be doing it. How we help you raise the bar is by focusing on the three things that really matter for equipment productivity: Payload, People and Engineering.

SCHLAM 

A UNIQUE ENGINEERING MINDSET

We started in 1996 as a problem-solving engineering business. This engineering mindset is ingrained into everything we do, whether you're using one of our ground-breaking payload products or you have a Schlam Superstar working on your equipment.

Today, we've grown to become one of Western Australia's largest family-owned mining services companies and you'll find our products and maintenance people at work across mines on six continents.

With an ambition to be at every mine in the world, we're still working to become the business we want to be.

CUSTOMER EXPERIENCE IS WHAT DRIVES US

Delivering exceptional customer experiences is what gets us up each day. For us, this goes beyond just making sure we deliver what we promise. It means seeing the bigger picture of how our products and services impact your mining operations.

It's this ability to take a holistic view that enables us to solve your productivity problems more effectively.

PAYLOAD SOLUTIONS

Payload products that challenge what you think you can achieve with your fleet of open pit and underground machines.

HERCULES OPEN-CUT DUMP BODIES

BULLANT UNDERGROUND DUMP BODIES

BARRACUDA EXCAVATOR BUCKETS

BARRACUDA BUCKETS

PEOPLE SOLUTIONS

The superstars in equipment maintenance, rebuilds, shutdowns and cleaning. Ready to join your team for as long as you need them, or to bring their expertise and field equipment to your site at a moment's notice.

CUSTOM FABRICATION AND MACHINING

LEAVE NOTHING IN THE GROUND

TRANSFORM YOUR COST PER TONNE

Schlam Payload designs and custom engineers the world-leading *Original DT HiLoad* Hercules dump truck bodies, Bullant underground dump bodies, and Barracuda buckets. Products that have raised the productivity bar of OEM open-cut and underground machines.

IMPROVING PAYLOAD GLOBALLY

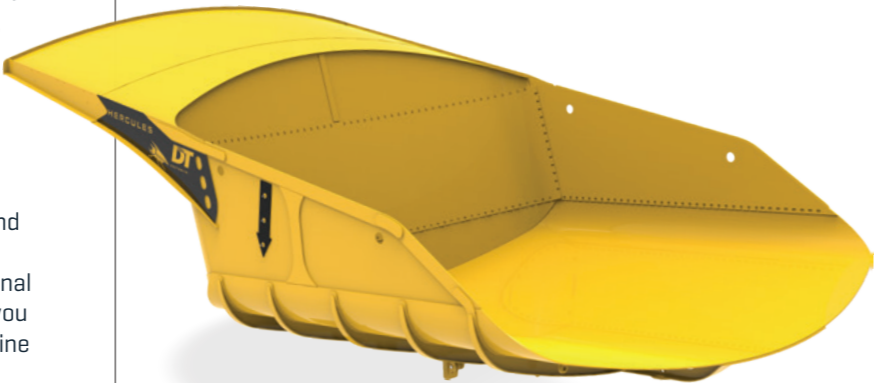

Our Payload products are manufactured and sold around the world. As our products are custom engineered and built from the ground up based on your unique operational requirements, our global reach means we can provide you with a cost-effective payload solution, wherever you mine in the world.

THOUSANDS IN OPERATION

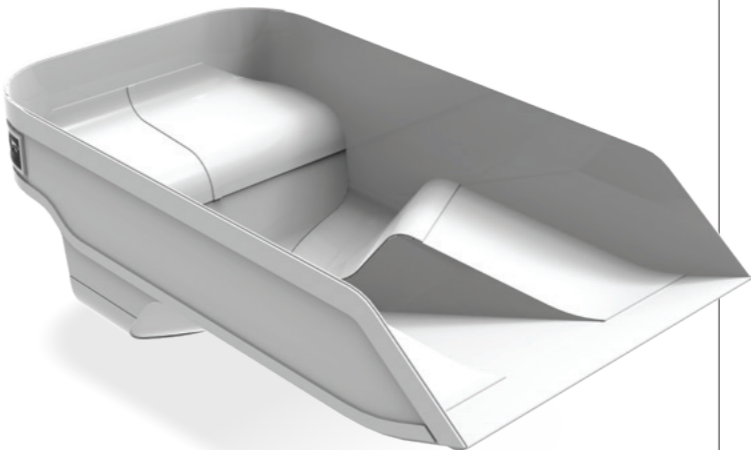

Hercules’ innovative curved dump body design promises to revolutionise your payload capacity, whatever class of haul trucks you use. The fact that there are over 1,000 Hercules dump bodies in Australia alone is proof that the Hercules can add millions of dollars free in cash flow to your operation.

HERCULES OPEN-CUT DUMP BODIES

BULLANT UNDERGROUND DUMP BODIES

BARRACUDA EXCAVATOR BUCKETS

BARRACUDA BUCKETS

- HIGHER PAYLOAD AND PRODUCTIVITY
- LOWERS CAPITAL EXPENDITURE
- REDUCED DOWNTIME
- LOWER FUEL USAGE PER TONNE

- INCREASES PAYLOAD UP TO 12%
- HIGHER FLEET PRODUCTIVITY
- LOWERS CAPITAL EXPENDITURE
- REDUCES DOWNTIME

- CUSTOM DESIGNED
- ENGINEERED TO MATCH YOUR FLEET
- DEDICATED DESIGN AND BUILD TEAM
- SHORT LEAD TIMES

THE SUPERSTARS IN EQUIPMENT PRODUCTIVITY

PEOPLE WHO SOLVE PROBLEMS

Why hire 'labour' when you can get a Schlam Superstar to work on your equipment.

We employ maintenance people who have an engineering mindset and a keen sense of higher service. People who know how to identify and solve problems and get the job done, even under extreme pressure.

What this means is you can get your equipment back up and running sooner.

A PERSON FOR EVERY PROBLEM

Our People team comprises achievers in every mechanical, electrical and heavy fabrication discipline. People who know how to repair, rebuild and maintain all makes and models of heavy mobile equipment, as well as fixed plant including crushing, processing and conveyor systems.

Put a Superstar to work on your problem right now.

PRODUCTIVITY PROBLEMS DON'T SOLVE THEMSELVES

RETHINK THE WAY YOU DO THINGS

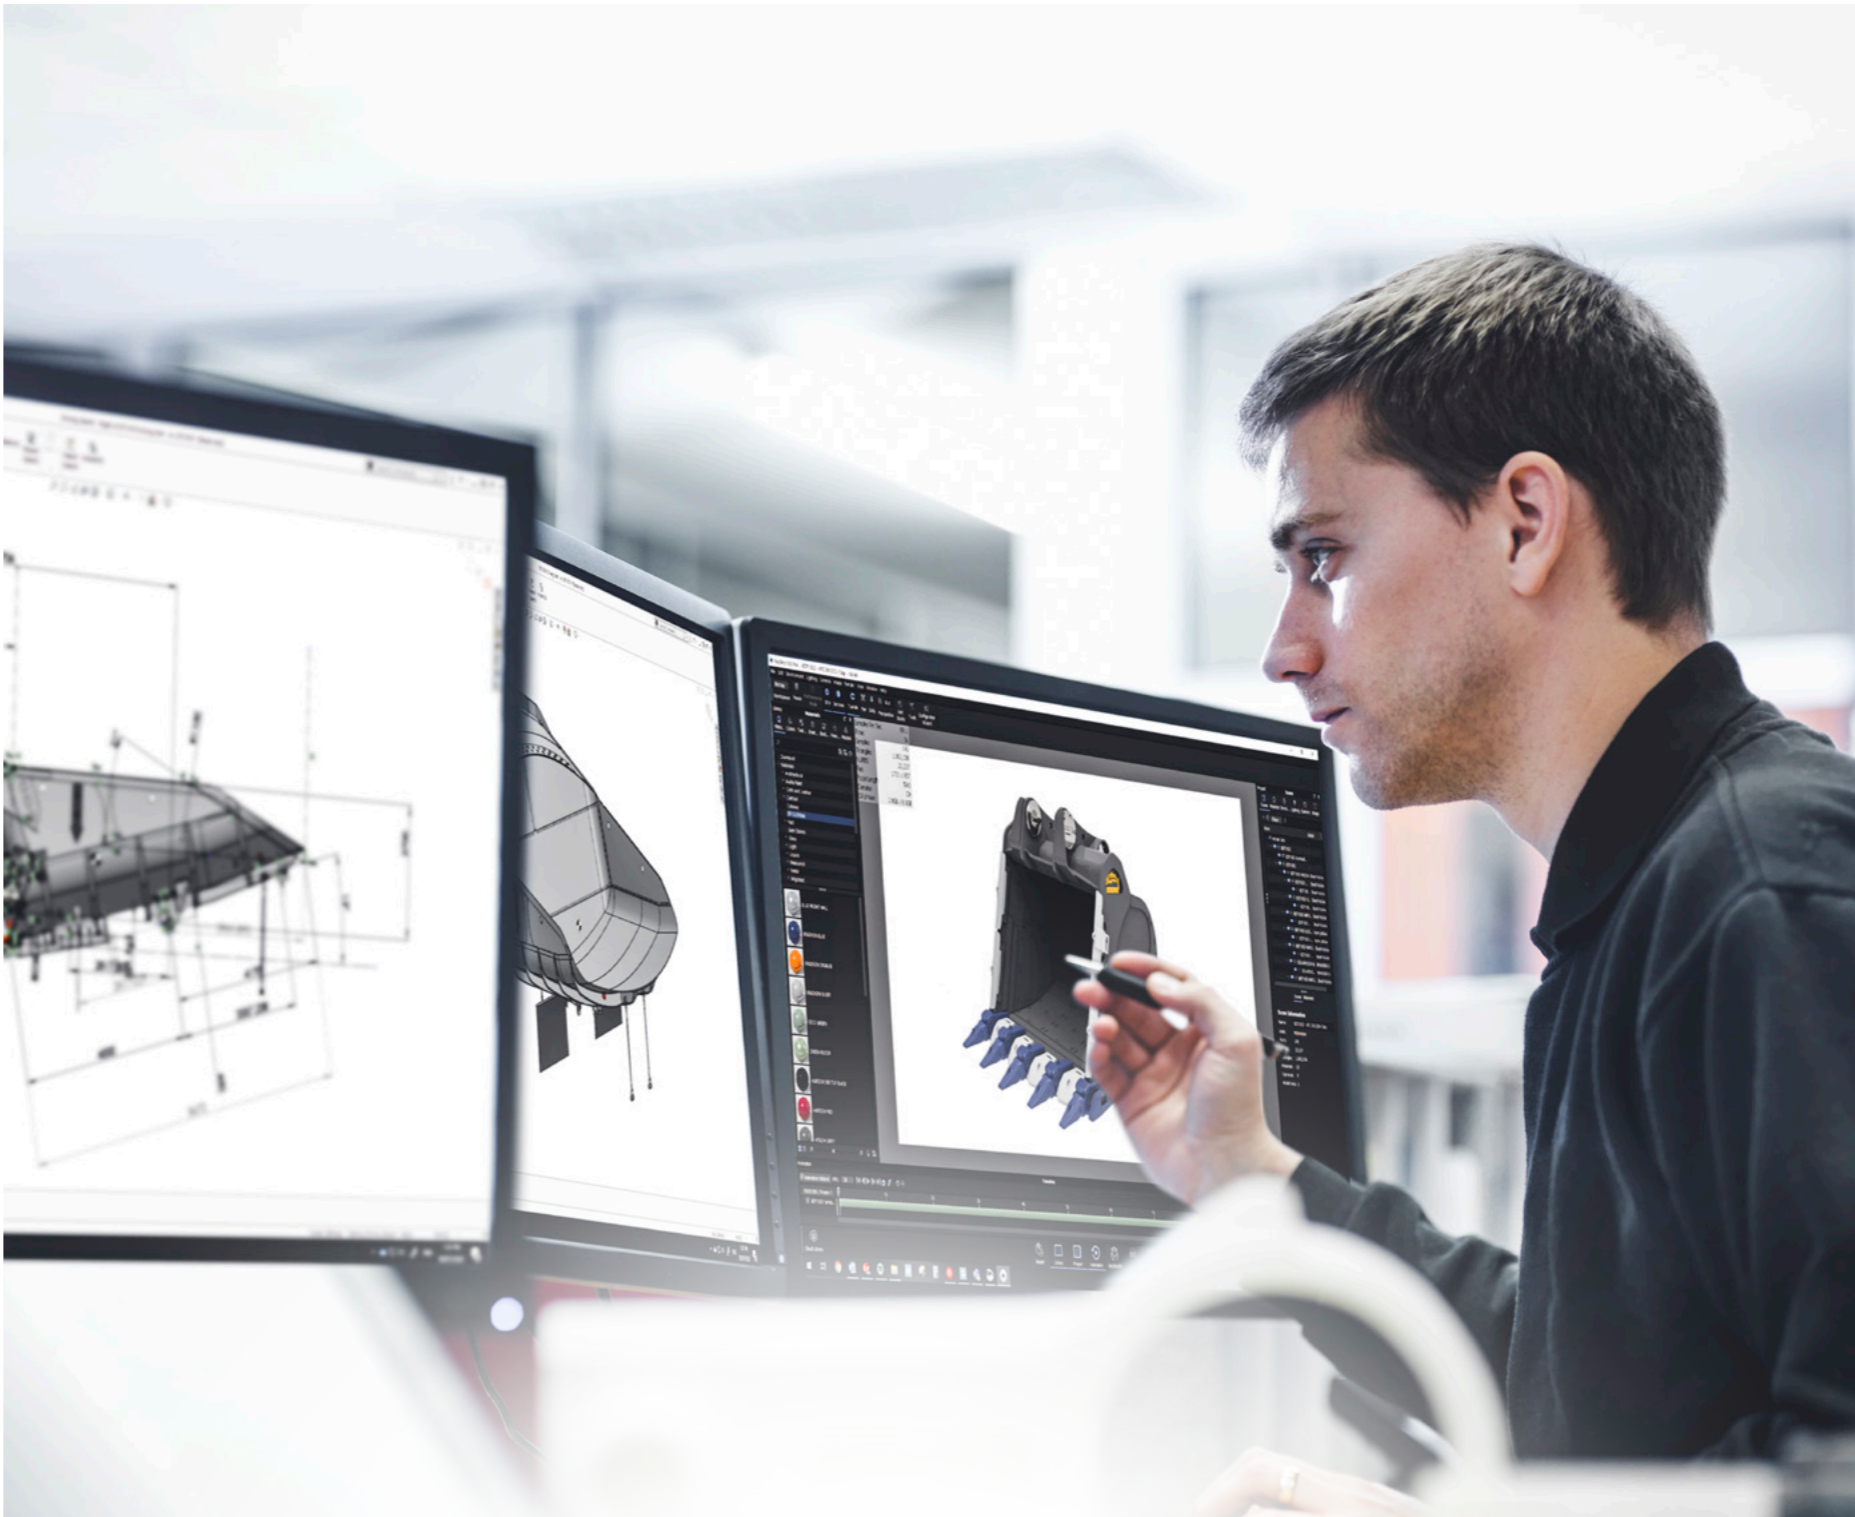

If you want a major leap forward in the productivity of your mobile equipment or fixed plant, then you'll need people who can rethink and reinvent the way you're currently doing things.

That's where our engineering team come in. They bring hands-on experience and knowhow from working on some of the most complex payload, materials handling, safety and productivity problems for our mining customers.

WE SEE THE BIGGER PICTURE

The strength of our engineering solution is the ability to take a holistic view. To look beyond the immediate problem, we are being asked to solve and see how it fits into the bigger picture of your mining operation.

That way, we can design and engineer you a solution that results in a real improvement in your mine's productivity and safety.
